Edgewater Plaza Unit Owners

RE: Edgewater Plaza Group Mediacom Cable TV Service Changeover Update #3

Dear Unit Owners:

The Mediacom Cable TV Service changeover is progressing as scheduled. Mediacom technicians have been on-site for the past four days updating the coax cable infrastructure (replacing cable's that feed the service to the buildings, and replacing any/all cable splitters and connections throughout the buildings and individual units). They are also testing the connections within each unit to ensure that there is a successful digital/high definition signal, and replacing any equipment (cables/splitters/connections) required for a successful signal. The result of doing this should lead to a more stable service provided by Mediacom, and we may experience a better picture quality, especially as it pertains to high definition TV's.

We are still on-schedule for an early April cutover to the new service. As always, please check the Edgewater Plaza website often for updates (link below):

If you have any questions, please don't hesitate to contact a Board member for further clarification.

Thank You,

The Edgewater Plaza Board of Directors
